Case 2 Enhanced: speedup vs. 1 connection
(same topic and failure probability; mean, error bars propagated)
ideal linear speedup (reference)
gatto_big150, p=0.00
gatto_big150, p=0.05
gatto_fault20, p=0.00
gatto_fault20, p=0.05
Speedup = throughput(N) / throughput(1)
